Press Release: Stetron Announces Release of New Blog

Buffalo, NY, Thursday September 21, 2017: Stetron, one of the key audio suppliers in North America, has announced the official launch of their [new blog](#). Stetron hopes the [new blog](#), found at Stetron.com/blog, will be a resource for its customers as well as the audio industry.

The blog will feature content written by Stetron’s engineering team, and will focus on key topics in the audio industry as well as new product launches and educational pieces. The blog will work to expand Stetron’s efforts to connect more with their customers and will complement the company’s [Linked In](#) and [Facebook](#) pages.

“This new online space will allow Stetron to use one of our key resources, our incredibly skilled engineering team, as they share their knowledge with our customers”, said Monique Steger, Stetron’s President.

The [new blog](#) will be updated bi-weekly through the end of the year.

Stetron

Stetron is a premier supplier of custom audio solutions to fortune 500 companies worldwide. Established in 1965, Stetron has spent years fine tuning the product engineering of microphones, speakers, dynamic receivers and loudspeakers. Stetron’s Asian based manufacturing coupled with North American engineering, delivers technically advanced products at competitive prices.

Stetron strives to provide the highest level of customer and technical support in the industry. They work with customers to fully understand their audio requirements and help them design solutions that meet their requirements. Stetron maintains a full anechoic chamber and uses sophisticated software to measure a number of parameters including: THD, Life and load testing, Thiele Small Parameters, Impedance and Environmental. Stetron provides a strong technical experience and data you can trust.

Stetron maintains a global presence with offices in Toronto, Canada; New York, United States; Taipei, Taiwan; Ningbo and Foshan, China.
